March 2018 Property Manager Report

Knox Box

- Knox Box is a national program that provides a way for your local fire and rescue to enter businesses and homes in case of an emergency without having to use force or create damage. I have provided a **link below** to information that has answers to questions and gives you insight to this outstanding program.

[Knox Box information about the program](#)

[Knox Box questions & answers](#)

Reminder

- RV parking is only allowed in the last row of the Chateau parking lot. Parking is limited to first come and is restricted to no more than 3 days.

Waterfall

- We are aware that we currently have a waterfall water pump (1 of 3) not working. This situation will be investigated and resolved as soon as possible.

Fountains

- All fountains will be back in the ponds in April, all fountains had all lights replaced and should be in good working order.

Spring Clean Up

- As the installation of mulch is completed in the common area, the spring clean up will be completed in the homes areas. This includes cutting of all the tall grass

Street Lights

- A number of you have reported the street lights at the Atlantic road entrance onto Del Webb parkway are not working. We have had this checked out to find there has been a power line cut in the construction area. This will be restored as soon as possible.

Have a great weekend!

Thank you,
