

The Transition Plan on the portal has been removed as it is being reviewed by the Transition Committee. Along with the Britton Falls plan that has been on the portal for several years, the Pulte Group has provided the committee with a plan that they have been using for years.

The Transition Committee is comparing both plans with the purpose of providing a final plan that incorporates the best of both plans. It is the goal of the committee to publish a finalized plan on the portal sometime in the second quarter of 2019.

Soon after the final plan is published, the committee will begin to recruit homeowner volunteers to work on the various teams that will be needed for a smooth transition to a homeowner-controlled HOA.
